

An African land snail has 5,000 teeth!

If a bearded dragon is in danger, it runs away on two legs because it is faster than using all four legs!

My tail helps me to balance!

Snakes smell with their tongues!

Rosie the tarantula feels sounds through the hairs on her body.

**RJB and RLW were very excited to have a workshop delivered by Georgie from ZooLab. We looked at the senses of animals and compared them to our own senses.**
