1. The numbers in the sequence increase by 23 each time.

Find the missing numbers:

29 75 98

2. Find the missing digits to complete the calculations:

$$4 \square + \square 5 = 7 \square$$

$$5 \square 0 - \square 4 \square = 2 \square \square$$

$$4 \square 0 0 - \square 4 0 0 = 1 \square \square 0$$
