

# Seeds and Bulbs

Some plants grow first from a seed, and then develop a bulb that helps them to grow back year after year.

A bulb lets the plant rest underground over the winter when it is too cold, then grow back later in the year when conditions are right.

**Flower Bud:**  
Future flower stored inside the bulb for protection.

**Tunic:**  
A papery outer covering.

**Scales:**  
Thick leaves that store the food.

**Roots**

**Stem**

# Seeds and Bulbs

Here are some common plants that grow from bulbs.
